STRETCH FILM

Jumbo films

Width	Thickness	Gross	Core	Elongation	Colour
500 mm	17, 20, 23 my	50 kg	1,6 kg	150%, 200%	Transp., black ■■

Jumbo stretch film wholesale and retail.

- excellent quality
- discount price on pallet orders
- always in time

Machine stretch films

Width	Thickness	Gross	Core	Elongation	Colour
500 mm	12, 17, 20, 23 my	16,2 kg	1,6 kg	150%, 200% 300%, pre - stretched	Transp., black ■■

Stretch wrap machines are recommended for any business wrapping more than 15 loads per day. Stretch wrap machines help to reduce waste, increase efficiency, and promote a more secure and consistent load.

➔ [Get a quote for stretch wrapping machines](#)

Hand stretch films

Width	Thickness	Gross weight	Core	Core	Colour
500 mm	12, 17, 20, 23 my	2 - 2,5 kg	Single 220 g, 350 g	Returnable 650 g, 740 g	Transp., black ■■

Hand stretch wraps are recommended for any business usually for low amount of loads. It's very mobile but rather expensive choice. Pre-stretched film is stretched close to its ultimate break point prior to being wound onto rolls for final use. This means the film doesn't require as much stretching energy as a standard stretch film to achieve the same wrapping force.

CUSTOM SIZES AVAILABLE!

STRETCH FILM

Bundling stretch films

Width	Thickness	length of film	length of core	Colour
			 Extended core	
100 mm	12, 17, 20, 23 my	150 m	200 mm	Transp., black ■

Bundling stretch film offers many advantages over other packaging methods. Bundling stretch film can:

1. Reduce shipping costs by bundling items.
2. Protect shipments from various elements.
3. Replace tape without leaving a residue.
4. Be less expensive than tape, twine, strapping, etc.
5. Secure loads during transit.

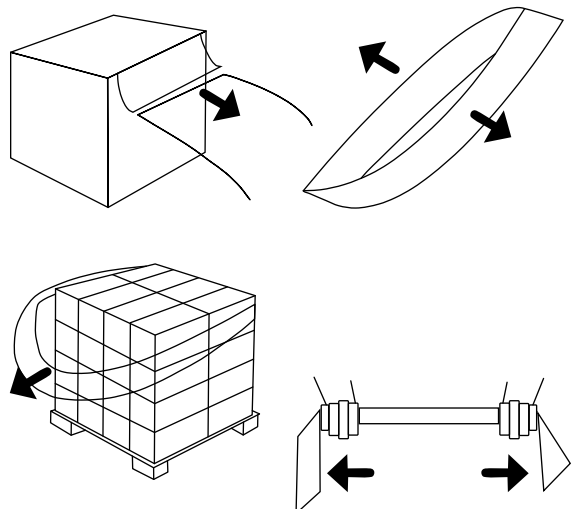

Elastic stretchband

Sizes	Quantity	Colour
	QTY	
100 x 600 mm	100 pieces / roll	Transparent ■
100 x 1200 mm	100 pieces / roll	Transparent ■
100 x 1400 mm	100 pieces / roll	Transparent ■
150 x 1200 mm	100 pieces / roll	Transparent ■
200 x 1200 mm	100 pieces / roll	Transparent ■

Elastic stretchband is the perfect solution for securing your items for in-plant transport. It can be drawn easily over the top layer without the use of equipment, after which the whole stack is entirely stable. Unlike when using adhesive tape for example, your boxes will not be damaged in the process. **Elastic stretchband is also ideal for securing edge protection strips.**

Elastic stretchband is moisture-resistant and food safe. You can find the most common dimensions listed below. **Additionally, we are happy to produce our stretchband according to your requirements in terms of dimensions and colour.**

STRETCH FILM

Stretch film for food and beverage

Width	Length	Thickness	Inner diameter of core	Colour
				
500 mm	500 - 2000 m	8,5 - 16 µm	76 - 112 mm	Transparent 

Stretch films used for tray packaging of fresh food. Equipped with excellent gloss / luster properties, self-stickiness, compatibility with automatic packaging machines, meets customer's needs with standard quality.

STRETCH FILM TOOLS

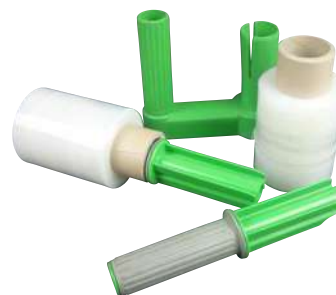

STRETCH FILM DISPENSERS

Two handed manual stretch film dispenser	Quality	Colour
The two handles are specifically designed to allow stretch film applications to be less energy intensive	This two handed manual stretch film dispenser is composed of a lightweight metal alloy	Various

STRAPPING

Strapping				
Material	Size	Thickness	Weight	Colour
				
PET	12 mm x 3000 m	0,60 mm	—	Green 
PP	16 mm x 3000 m	0,55 mm	—	Black 
Textile	16, 19, 25, 30, 32 mm x 850 - 2000 m	—	—	White 
Steel	16 mm x 17 m / kg	—	25 kg	Metallic 

POLYPROPYLENE STRAPPING

Strapping used on shipment of chemical weapons

Steel is the oldest and highest tensile strength strapping. It is available in a variety of widths and thicknesses as well as variations in the grade of steel.

Steel is used for heavy duty holding where high strength and minimal stretch are desired. Surface finishes for steel strap include: paint, paint and wax, bluing or zinc and wax.

POLYESTER STRAPPING (PET)

Polyester strapping is characterized by a very consistent tensile strength and very high elongation. Characteristics that are most decisive factor for a safe and reliable strapping method. Unlike strapping made from steel, Polyester strapping having its very high elongation, is able to absorb shocks and impacts during transportation and handling far better than steel strapping is capable of.

The excellent elongation allows the substitution for the same application with Polyester strap having a lower breaking strength.

POLYESTER STRAPPING (TEXTILE)

WOVEN POLYESTER STRAPPING equals the breaking strain of steel strapping but is only 16% of the weight for similar specification. Unaffected by extremes of temperature or humidity and easy to handle, with no sharp edges to injure operatives or product. It can be re-used when secured with heavy duty steel buckles or easily scrapped with normal waste. Because it is woven, the strapping tape has bi-directional strength and will not split lengthways.

Available custom printed to order

PP BALER TWINES

PP Baler Twine		
Type	Size	Colour
		
5 kg / roll	360 m / kg	White <input type="checkbox"/>
5 kg / roll	600 m / kg	White <input type="checkbox"/>

Premium Quality- Produced from the finest PP material.

- Heavy Duty- Not easily broken during the hay baling operation and transportation process.
- Tension Tested- Tested and certified strong tension by the authority.
- UV Stabilized-Containing high quality anti-UV additives.
- Softness- Soft smooth texture to reduce knottor wear.

POLY BAGS

Plastic bag manufacturing, wholesale supplies

Custom size & printed poly bags

Custom labeling for brand recognition

Clear, black or a wide range of colored poly bags

Low quantity custom runs

Food packaging in sheet film or perforated roll

Our packaging specialists can offer creative and cost-effective solutions for your most challenging projects.

We offer a variety of customizable food-grade bag options to fit your food packaging needs. We manufacture custom food safe bags in different sizes, styles, and thicknesses for food processing and packaging applications. We offer a huge selection of customizable poly food bags, along with the best prices and fast lead times.

Reclosable self seal zip bags

High quality LDPE easily and quickly zip self seal plastic bag for common use

Food Storage Plastic Bag

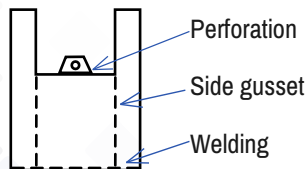

Wide range of high quality HDPE and LDPE bags for storing food in fridge or deep-freezer

Vacuum bags

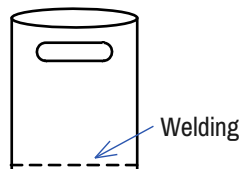

Durable, multi-ply material creates an air-tight seal to lock in freshness and taste. Keeps fresh up to 5X longer

HDPE/LDPE bags

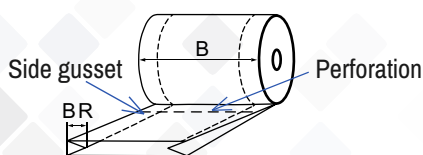

Used for storing and transporting goods such as food. Made of thin, flexible, plastic film

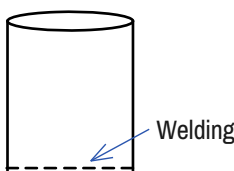

Shopping bag

Bag with handles

Garbage bag roll

Raschel bags

Size	Max loading capacity	Net weight	Material	Colour
				
33 x 47cm	5 kg	cca 12 gr/db	PE, PP	Red, yellow 
40 x 60 cm	10 kg	cca 17,5 gr/db	PE, PP	Red, yellow 
50 x 80 cm	15 kg	cca 28 gr/db	PE, PP	Red, yellow 

Raschel have been the most modern packaging materials for packing, storing and transporting vegetables and fruit so far. The weight of the bag is only a thousandth part of the filling weight and it provides perfect airing of the products. Its net-like outlook and the well-chosen colour provides esthetic appearance for the products.

PP woven sacks

Width	Length	Net weight	Material	Colour
				
450 - 600 mm	800 -1100 mm	60 g/m ²	Polypropylene	White <input type="checkbox"/>

Woven bags are ideally suitable for applications where strong and costefficient packaging is requested.

They are tough, breathable, cost effective bags, ideally suited for packaging agricultural products like grains, pulses, seeds and sugar, as well as products as diverse as sand, fodder, chemicals, cement, metal parts, etc.

LDPE* / HDPE* Harvester bag

Width	Length	Thickness	Quality	Colour
				
550 mm	1100 mm	0,1 mm	original	Transparent <input type="checkbox"/>

Typical HDPE film applications include bags; liners; food and nonfood packaging; agricultural and construction films.

HDPE bag is often used in many of the same applications as LDPE and LLDPE and in some cases it is blended with LDPE to modify its properties. HDPE is well suited for applications where a greater tensile and compression strength is needed and/or when higher stiffness and rigidity is required. Like LDPE, HDPE possesses excellent impact strength and corrosion resistance.

*LDPE: in-store (we can manufacture LDPE film any time you need)

*HDPE: only for pre-order

CUSTOM SIZE AVAILABLE!

POLY BAGS

LDPE* / HDPE* Film				
Width	Length	Thickness	Quality	Colour
				
1000 mm	1000 - 2000 mm	0,1 mm	original	Semi-transparent 

High density polyethylene or HDPE is a low cost, milky white, semi-translucent thermoplastic. It is flexible but more rigid and stronger than LDPE and has good impact strength and superior puncture resistance. Like LDPE, it also has good chemical resistance, good release properties, and good vapor but poor gas barrier and weathering properties.

*LDPE: in-store (we can manufacture LDPE film any time you need)

*HDPE: only for pre-order

Heavy duty garbage bag				
Width	Length	Thickness	Quality	Colour
				
550 mm	1100 mm	0,083 mm	recycled	Black 

Extra-strong, heavy-duty trash bags are 3 times more puncture-resistant than standard liners.

390 mm	420 mm	0,050 mm	Various, custom

Frosty shopping bags

490 mm	420 mm	0,050 mm	White, colourful, custom
--------	--------	----------	--------------------------

Clear frosted plastic shopping bags with a 6 mil handle in a convenient 250 pack of 250. We can print it! Personalize your bags with a company name and/or logo.

PP woven bag with twine handle

Szélesség	Hosszúság	Talpméret	Szín
			
450 mm	450 mm	130 mm	Fehér <input type="checkbox"/>

- Very affordable, lower cost
- Flexible and high strength, persistent durability
- Can be printed on both sides
- Can be stored in an open area due to UV-stability, up to 6 months
- Water and dust proof design due to inside PE liners or laminated on the outside; hence, packed
- Materials are protected from outside humidity
- Twisted weave and anti-skid print to prevent slipping
- Fully Recycled

1200 mm	2 x 450 mm	1350 mm	0,06 mm	Nature <input type="checkbox"/>

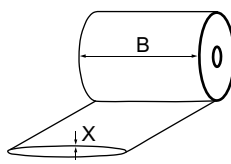

Shrink wrap is commonly used as an overwrap on many types of packaging, including cartons, boxes, beverage cans and pallet loads. A variety of products may be enclosed in shrink wrap to stabilize the products, unitize them, keep them clean or add tamper resistance. It can be the primary covering for some foods such as cheese, meats, vegetables and plants. Heat-shrink tubing is used to seal electric wiring. Shrink wrap is also commonly used within more industrial applications using a heavier weight shrink film. The principles remain the same with a heat shrinking process using a hand held heat gun.

SHRINK HOOD

Shrink hood is commonly used as an overwrap on many types of packaging, including boxes and pallets. It enables stability of pallets in storage and transportation. Additionally, it protects your products from dust, dirt, water, weather conditions and damage.

VCI FILM

Volatile Corrosion Inhibitors (VCIs, sometimes referred to as vapor corrosion inhibitors) provide excellent protection for metal surfaces and can prevent rust & corrosion for many years. VCIs are chemicals used directly on the product that needs to be protected. Elastic LTD's VCI films offer barrier packaging with effective corrosion protection allowing for safe, clean, and easy packaging of metal parts, machinery and equipment. These materials can be ordered as rolls, tubing, sheets and bags.

VCI PROTECTION IS A FUNCTION OF:

- Which Metals are in need of protection
- Corrosion inhibiting chemicals used and their effectiveness on the metals.
- Ratio of chemicals in the formulation.
- Amount of VCI on the paper or in the film • pH of the finished product.
- Water solubility and the effectiveness of the corrosion inhibitor
- In the presence of moisture and/or high humidity.

PVC FILM

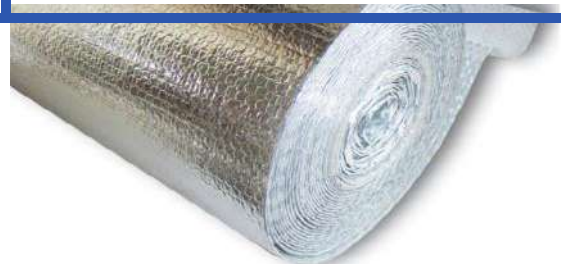

It is flexible, light, cost-effective, transparent, tough and safe. It has excellent organoleptic properties (does not affect the taste of the packaged food) PVC requires less fuel to manufacture and transport when compared with other packaging materials such as metal or glass, and protects against contamination by helping to prevent the spread of germs during manufacture, distribution and display.

METALIZED PE FOAM

Extruded polyethylene foam with metalized Polyester lamination in all places where the thermal insulating and heat-reflective ability of this laminated product is advantageous. It is applicable behind radiators, or as a wall- and ceiling covering (e.g. in storehouses) with its laminated side inward to the heated space.

ISOFOAM® LF-ALU PET 5 mm foam can be laid as a floating layer of floor heating with laminated side to the heated concrete screed. In order to avoid sound bridges, along the connecting walls and around floor penetrations (e.g. pipes), minimum 5 mm thick ISOFOAM® border strip has to be installed.

PACKAGING PROTECTORS

PADDED PAPER

As a diverse packaging product, padded paper is ideal for packaging and protecting all sorts of products – light and heavy articles in boxes of any sort.

Moreover, padded paper is easy to use and speeds up the packaging process – even with the nowadays frequently used smaller boxes.

Padded packing paper can be used for practically any purpose.

Size: 740 mm x 325 m 2 x 60g / m2

PS FOAM PENAUT

Foam peanuts, also known as packing peanuts, or packing noodles are a common loose-fill packaging and cushioning material used to prevent damage to fragile objects during shipping.

From electronics to tools, from toys to everyday household supplies, packing peanuts fill every corner and keep your packed items from shifting during your move. Foam packing peanuts may be used and reused beyond moving purposes, sometimes to fill a bean bag chair or in a variety of crafts.

Size: PS fehér 0,5 m 3TD / kg

AIR PILLOWS

Air pillows provide a durable block and brace product and a reliable cushioning material for light to medium weight products.

The lightweight properties of the air pillows reduce shipping costs and because the air cushions are produced on demand they require minimal storage space.

Air pillows provide excellent transit protection for your product by bracing products away from the edge of the rigid outer package. Unlike bubble wrap, packing peanuts or paper fillers, the product is unable to move within its box when protected by air pillows with less material used.
